## Dyna-Pro™

Dyna-Pro™ is the one product that no animal owner should ever be without! It uses a fermentation extract that nourishes the natural intestinal bacteria and encourages it to reproduce and grow. Physical and psychological stress caused by travel, breeding, treatment with antibiotics and some anti-parasite products can dramatically disrupt a goat's metabolism by destroying or depleting the beneficial intestinal bacteria. These microbes must produce all the enzymes necessary to convert the feed into a form that the animal can use. The beneficial bacteria also assist in vitamin production and help prevent harmful bacteria from colonizing in the digestive tract. Dyna-Pro™ is a must for any animal to improve the digestion of all feeds and supplements.

## Vitamin Mineral Free Choice for Browsers and Grazers

This premium product has been formulated as a salt and mineral mix foundation, containing the macro, trace and micro-trace minerals, herbs, yeast cultures and clays for optimum health.

## Pelleted Grain Ration

Pelleted Grain Ration (PGR) is a state-of-the-art scientifically balanced feed. It is chemical free and formulated to supply needed nutrients in balance for breeding, growth, and maintenance of goats. PGR is very concentrated, enabling you to obtain optimum results with less feed than you might normally use. It should be fed with top quality hay that has not been treated with chemicals.

## Dynamite®

Dynamite is a state-of-the-art supplement that reflects decades of research, development and use by the top trainers in the country and is highly favored for the use in pregnant, working and show animals. Originally formulated for horses, this supplement is effective in a variety of animals.

## Dynamite Plus

Dynamite Plus has all the goodness of Dynamite® at a reduced level, with the addition of natural mineral deposits and advanced biotechnology to help further increase the absorption of the feed ration. Additional ingredients are also available to help balance the pH levels. It is an excellent supplement for animals that do not need the additional 'horse power' generated by the original formula Dynamite.

## Free Choice Minerals

**Izmine™:** Izmine is a carbon-based mineral supplement containing more than 60 naturally-occurring minerals, enzymes, electrolytes and bio-nutrients in a readily assimilated form. It is extracted from prehistoric, organic deposits of kelp, crustacea and other marine flora and fauna.

**NTM™ Salt:** NTM Salt is an all-natural salt source, free from additives, bleaches and kiln-drying procedures. It is mined from a 100 percent natural, prehistoric seabed deposit. It contains no artificial ingredients or anti-caking chemicals of any kind, but does contain naturally occurring complimentary trace minerals.

**1 to 1 Free Choice™:** 1 to 1 Free Choice provides a ration of one part calcium to one part phosphorus. It is especially necessary for goats in phosphorus deficient areas, or if legume (alfalfa or clover) hay is fed.

**2 to 1 Free Choice™:** 2 to 1 Free Choice provides a ration of two parts calcium to one part phosphorus. It is especially necessary for goats in calcium-deficient areas, or when feeding grass hay.

## Excel™

Excel helps catalyze the digestion process and stabilize the pH levels. It is made from ancient sea bed extracts, yeast cultures, microbial products, Ester-C®\* and Gingseng and can be used as a top dressing or milled in with the feed.

## Herbal Tonic™

Because of some of the ingredients used in herbal medicine as an anti-parasite treatment, many users find Herbal Tonic to be an excellent adjunct to their worming programs. No other vitamin/ minerals supplements should be used when feeding Herbal Tonic.
